Installed assembly

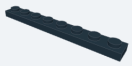

Installed · blue edges mark new parts

Start with the eleven-piece chassis after operation 6. This specimen covers only original operations 7–9.

Draft — construction unverified. Insertion not checked; strength and stability untested. See inspection.json.

2 Build the rear frame supports

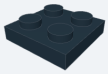

Collect for this step

2× Plate 1 x 8
Black · Part 3460 · LDraw 0

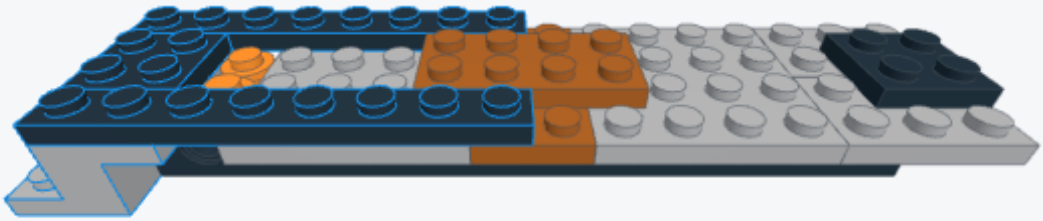

2× Bracket 3 x 2 x 1.333
Light Bluish Grey · Part 18671 · LDraw 71

1× Plate 2 x 2
Black · Part 3022 · LDraw 0

Attach both brackets to the longitudinal plates before adding the centre cap.

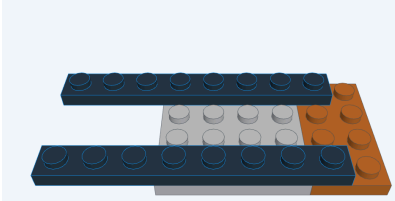

Finished state for this step

Finished state. Follow the details; additions are not inserted together.

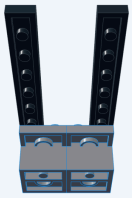

Numbered detail views: surrounding pieces are omitted for clarity. Follow the order shown; installed positions are shown without a movement hint.

1. Add both long plates

Place the two long plates on the chassis.

2. Fit both brackets

Fit one bracket on each long plate.

3. Add the centre cap

Add the cap after both brackets are in place.

Draft — construction unverified. Insertion not checked; strength and stability untested. See inspection.json.
