洋流號 / DSS Taipei Current

FULL BUILD

67 numbered steps

348 catalog pieces

348 rigid pieces
2 suspension bands + craft cord
Custom stickers supplied separately

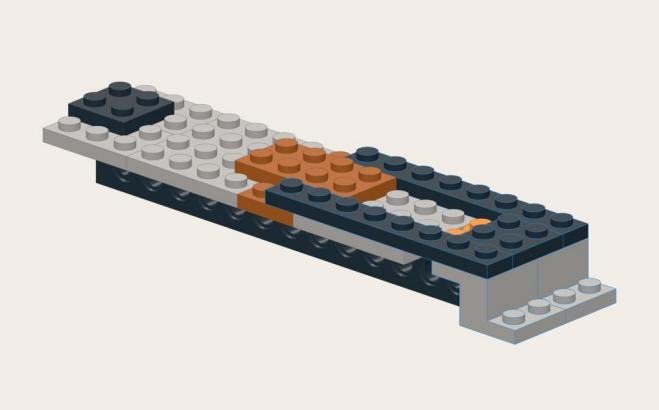

DRAFT FOR FIT REVIEW

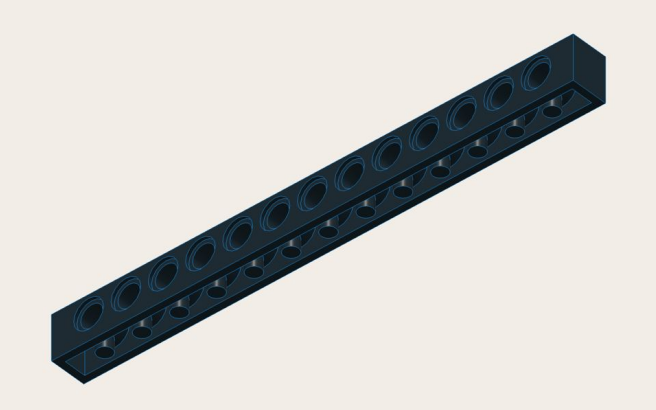

Complete illustrated sequence. Digital connection review is separate from physical fit, grip and suspension testing.

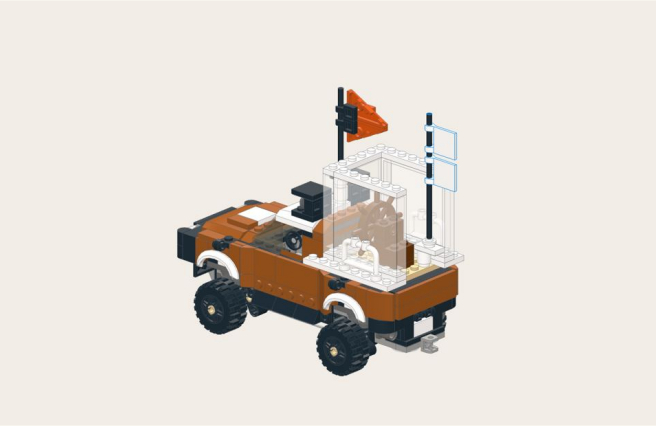

An independent fan design for use with genuine LEGO® bricks. Not affiliated with, sponsored by, or endorsed by the LEGO Group.
Full credits on the website

Our contributions: CC BY-SA 4.0

Read the pictures, then dry-fit

01 NEW PARTS

Blue outline = new.

02 CALLOUTS

2× = two copies.

03 DRY-FIT

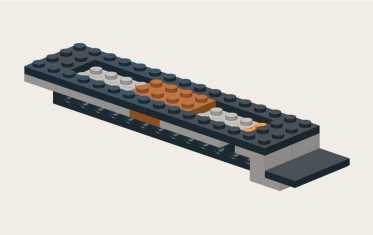

Check fit; do not force.

Print stickers at 100%; check the 20 mm ruler. Bands and cord are outside the rigid count. The cabin driver is omitted.

Test-build edition: full insertion replay, physical grip, suspension travel and handling strength remain unverified.

Our contributions: CC BY-SA 4.0

Chapters and parts

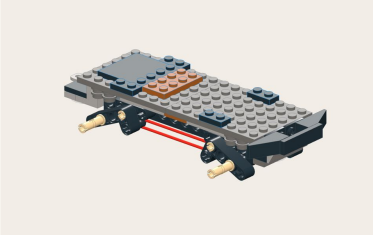

01 / Chassis frame

1 - 4

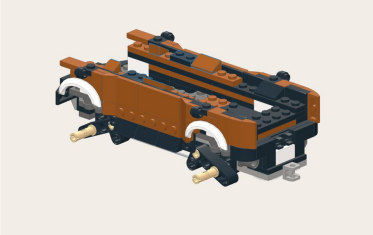

02 / Suspension and underside

5 - 12

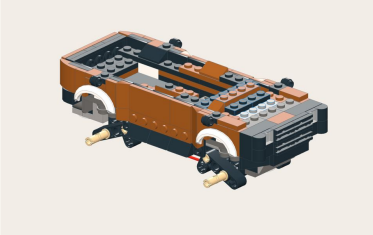

03 / Floor and lower body

13 - 16

04 / Body sides and wheel arches

17 - 32

05 / Tailgate and front body

33 - 39

06 / Cabin and figures

40 - 46

07 / Road wheels

47 - 47

08 / Rear platform and helm

48 - 54

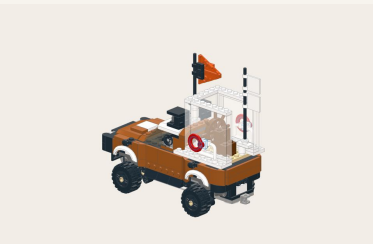

09 / Speakers

55 - 55

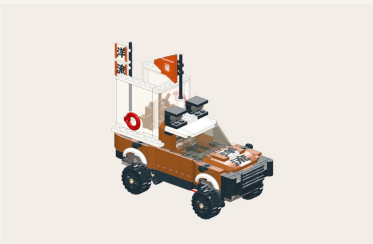

10 / Larger triangular flag

56 - 57

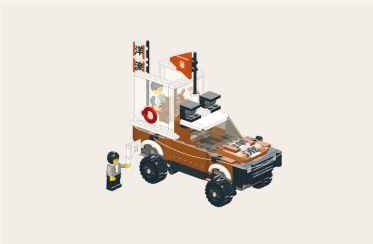

11 / Rear banner and life rings

58 - 60

12 / Stickers and launch configuration

61 - 64

13 / Figures and final placement

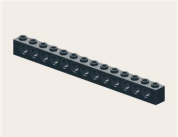

65 - 67

1 Start with one long chassis beam

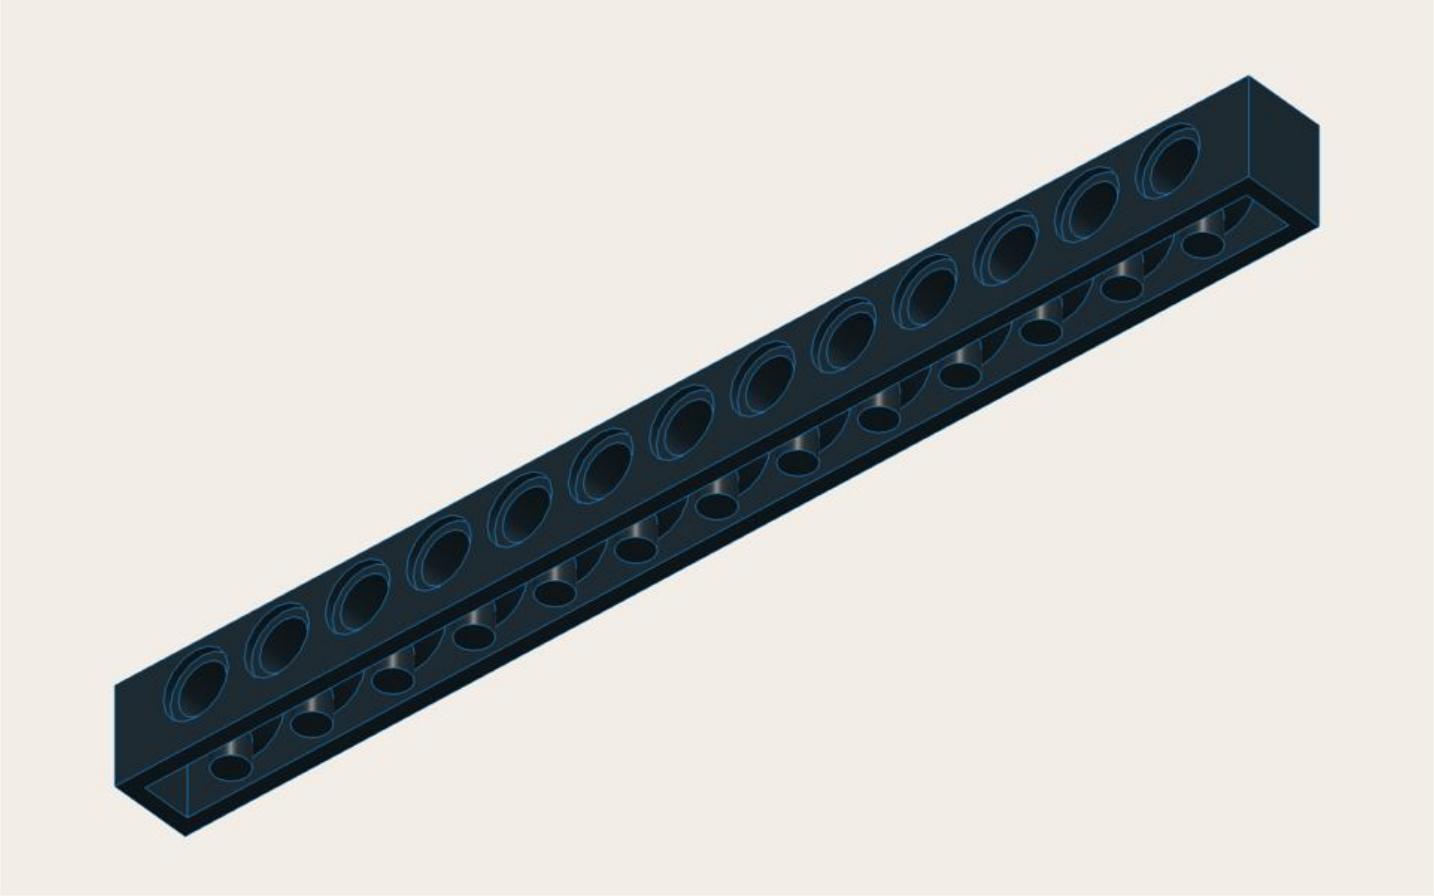

Panel 1 / 8

PARTS IN THIS STEP

1 x 32018

Black

Keep the second long beam separate until both pins are fitted.

Our contributions: CC BY-SA 4.0

1 Fit the two friction pins into the first beam

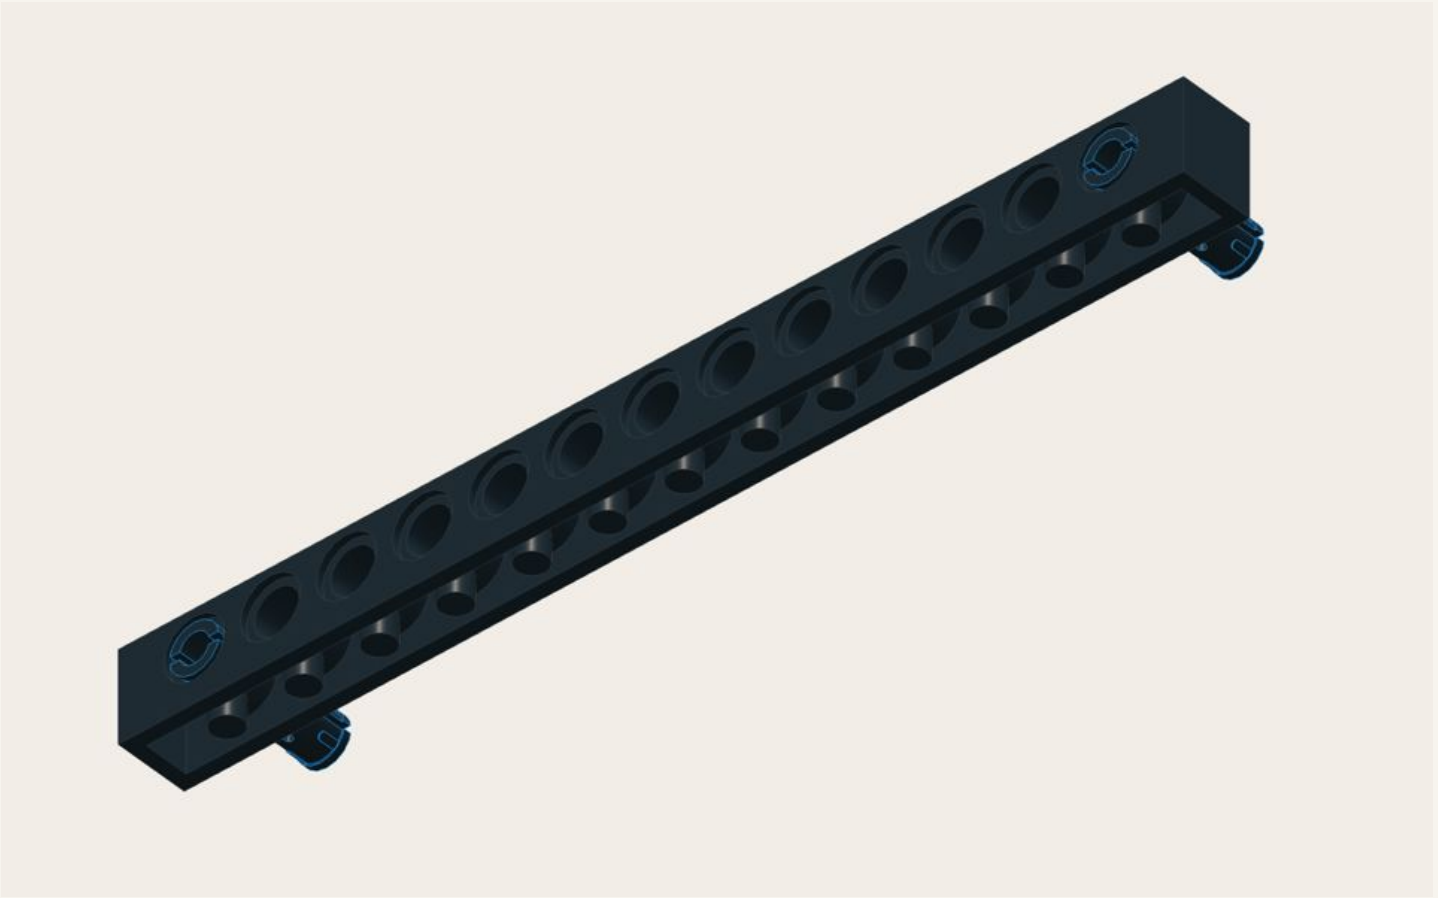

Panel 2 / 8

PARTS IN THIS STEP

2 x 2780

Black

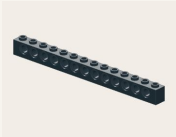

Fit one pin near each end. Leave both pin ends exposed toward the second beam.

Our contributions: CC BY-SA 4.0

1 Mate the second beam with the exposed pins

Panel 3 / 8

PARTS IN THIS STEP

1 x 32018

Black

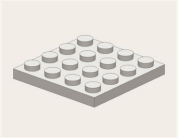

Align both holes. Seat both pins before adding tie plates.

Our contributions: CC BY-SA 4.0

1 Tie both beams with the square plates

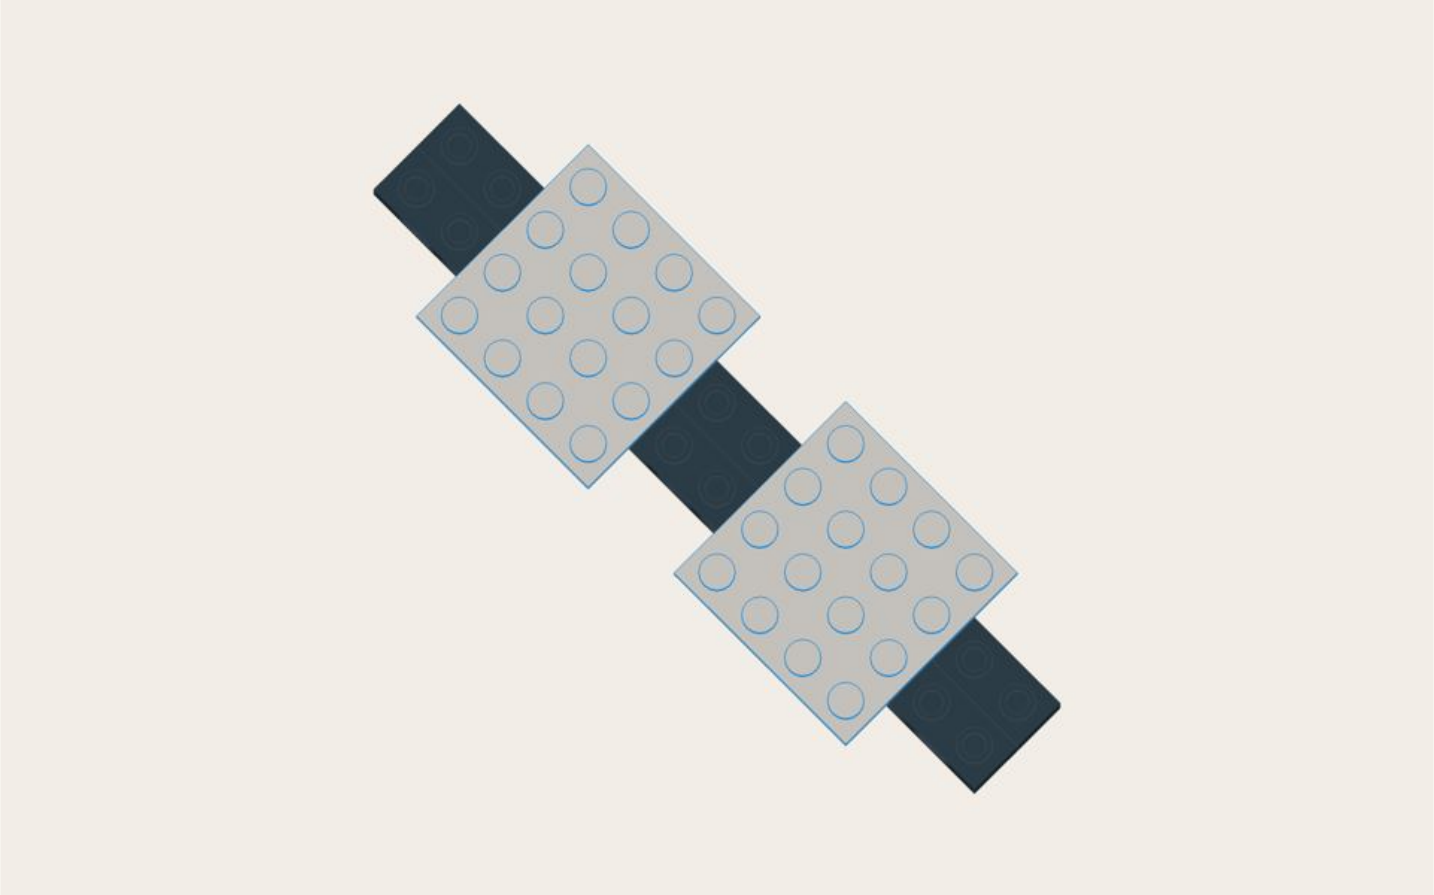

Panel 4 / 8

PARTS IN THIS STEP

2 x 3031

Light Bluish Gray

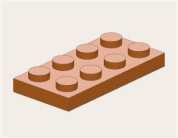

Our contributions: CC BY-SA 4.0

1 Add the centre and front ties

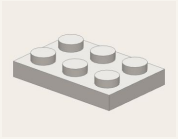

Panel 5 / 8

PARTS IN THIS STEP

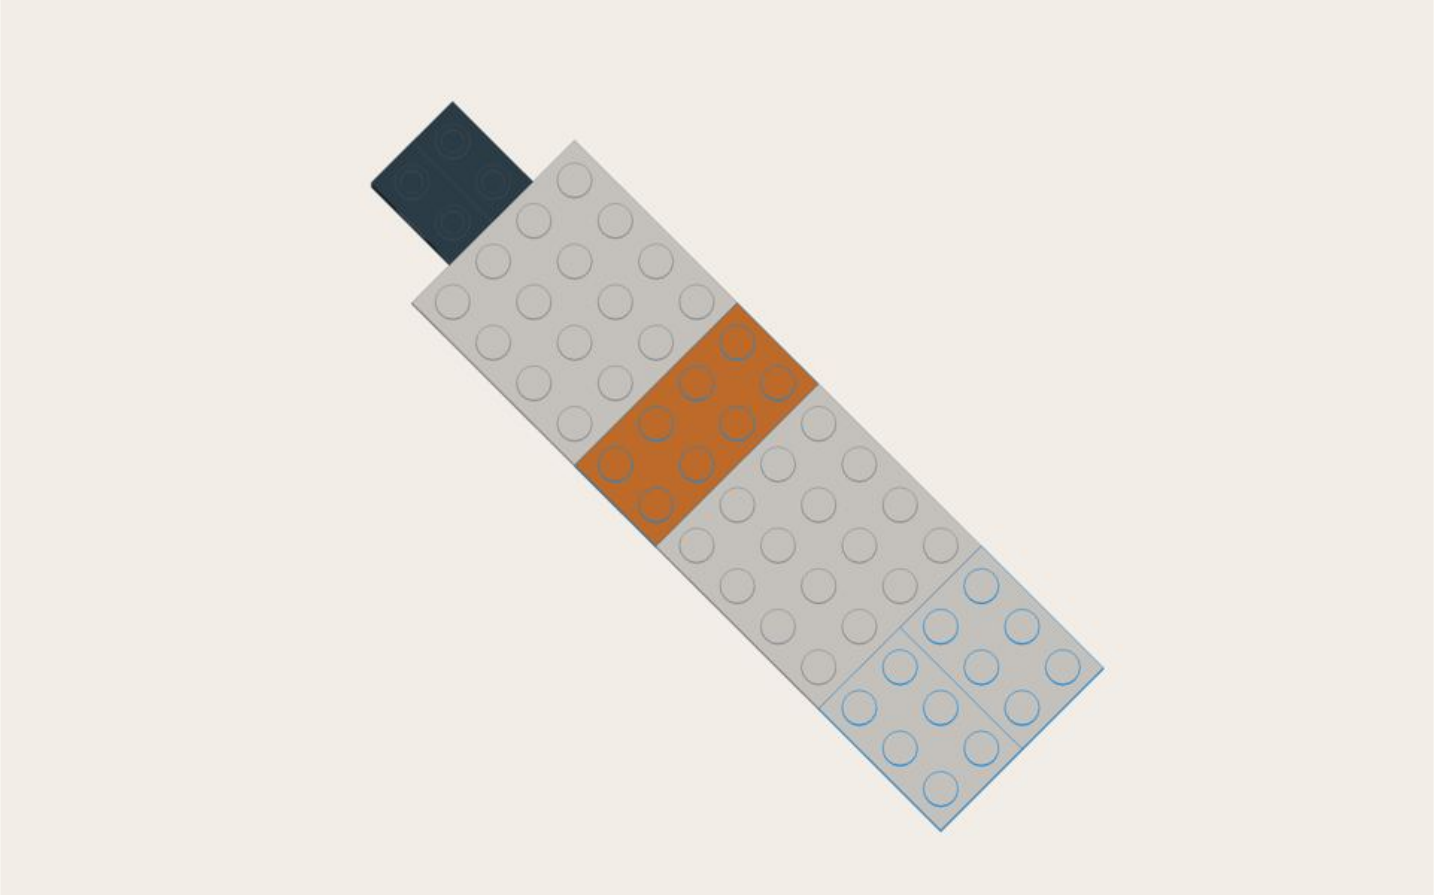

1 x 3020

Dark Orange

2 x 3021

Light Bluish Gray

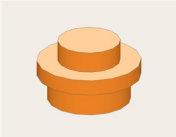

Our contributions: CC BY-SA 4.0

1 Fit both small round plates

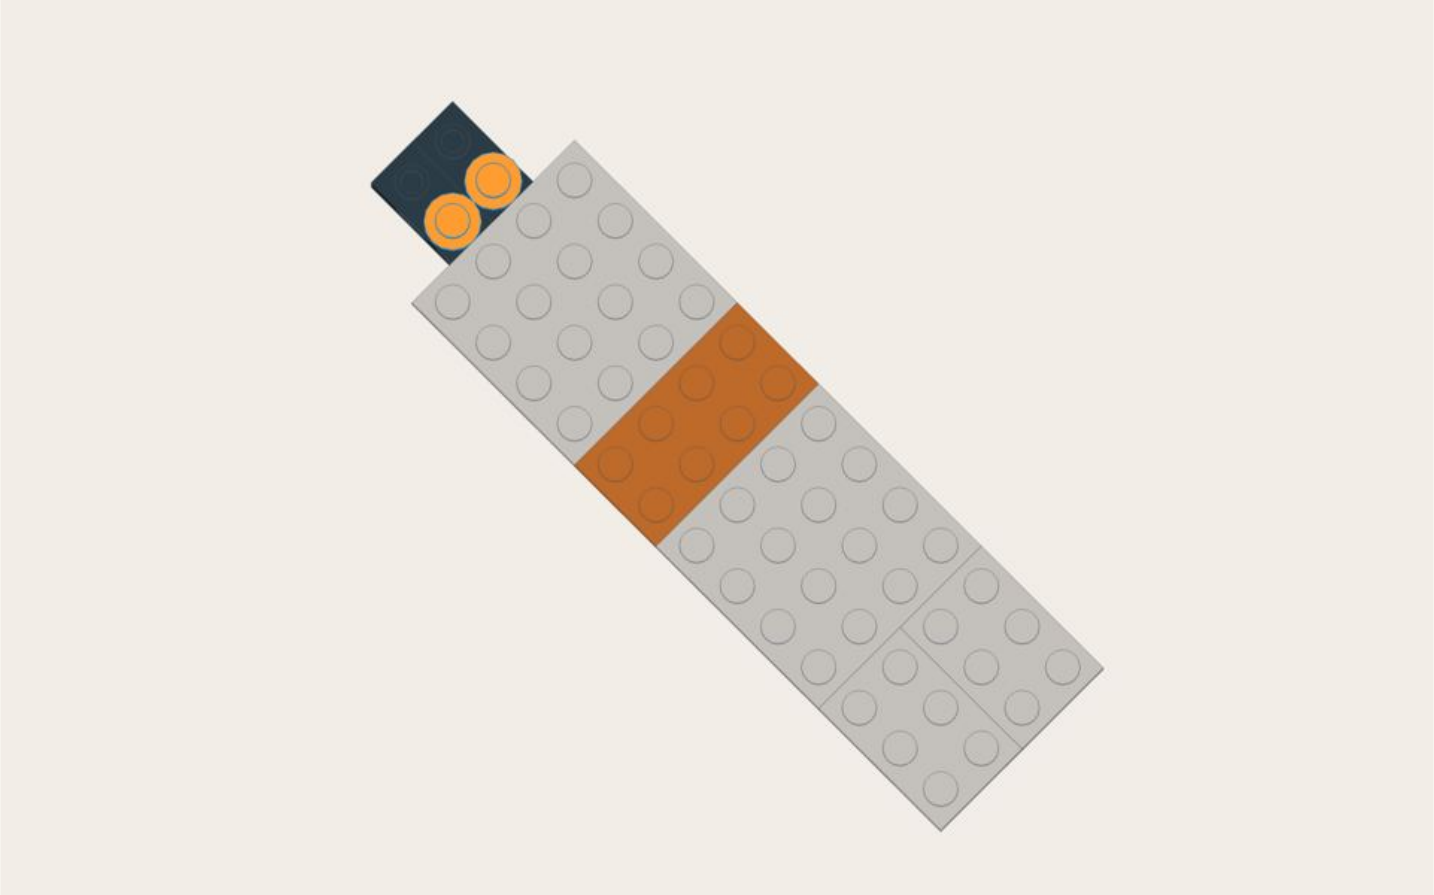

Panel 6 / 8

PARTS IN THIS STEP

2 x 6141

Orange

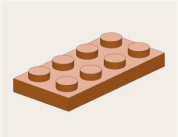

Our contributions: CC BY-SA 4.0

1 Cap the centre and frame ends

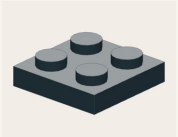

Panel 7 / 8

PARTS IN THIS STEP

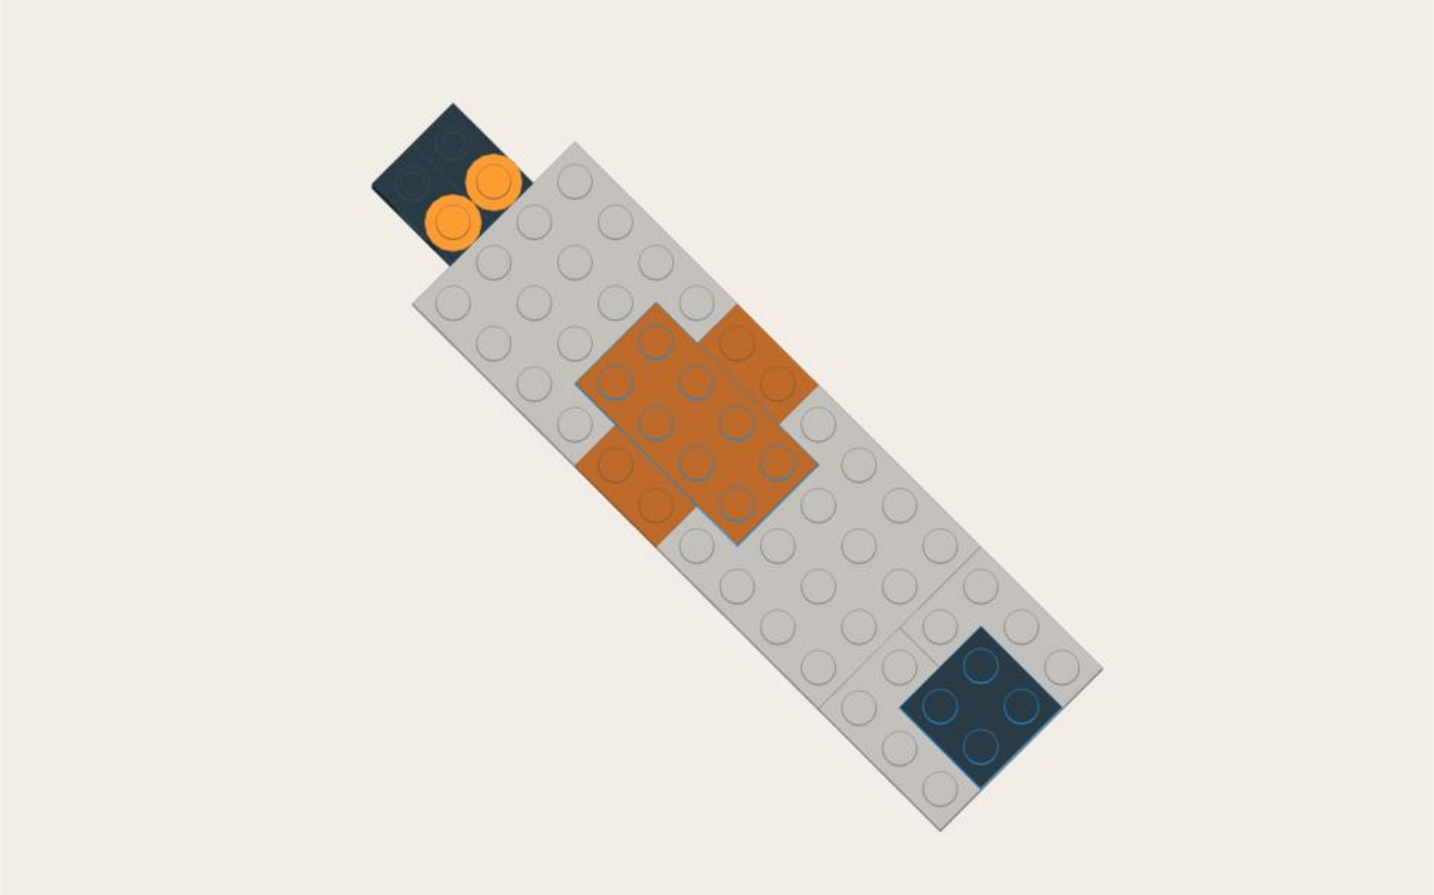

1 x 3020

Dark Orange

1 x 3022

Black

Our contributions: CC BY-SA 4.0

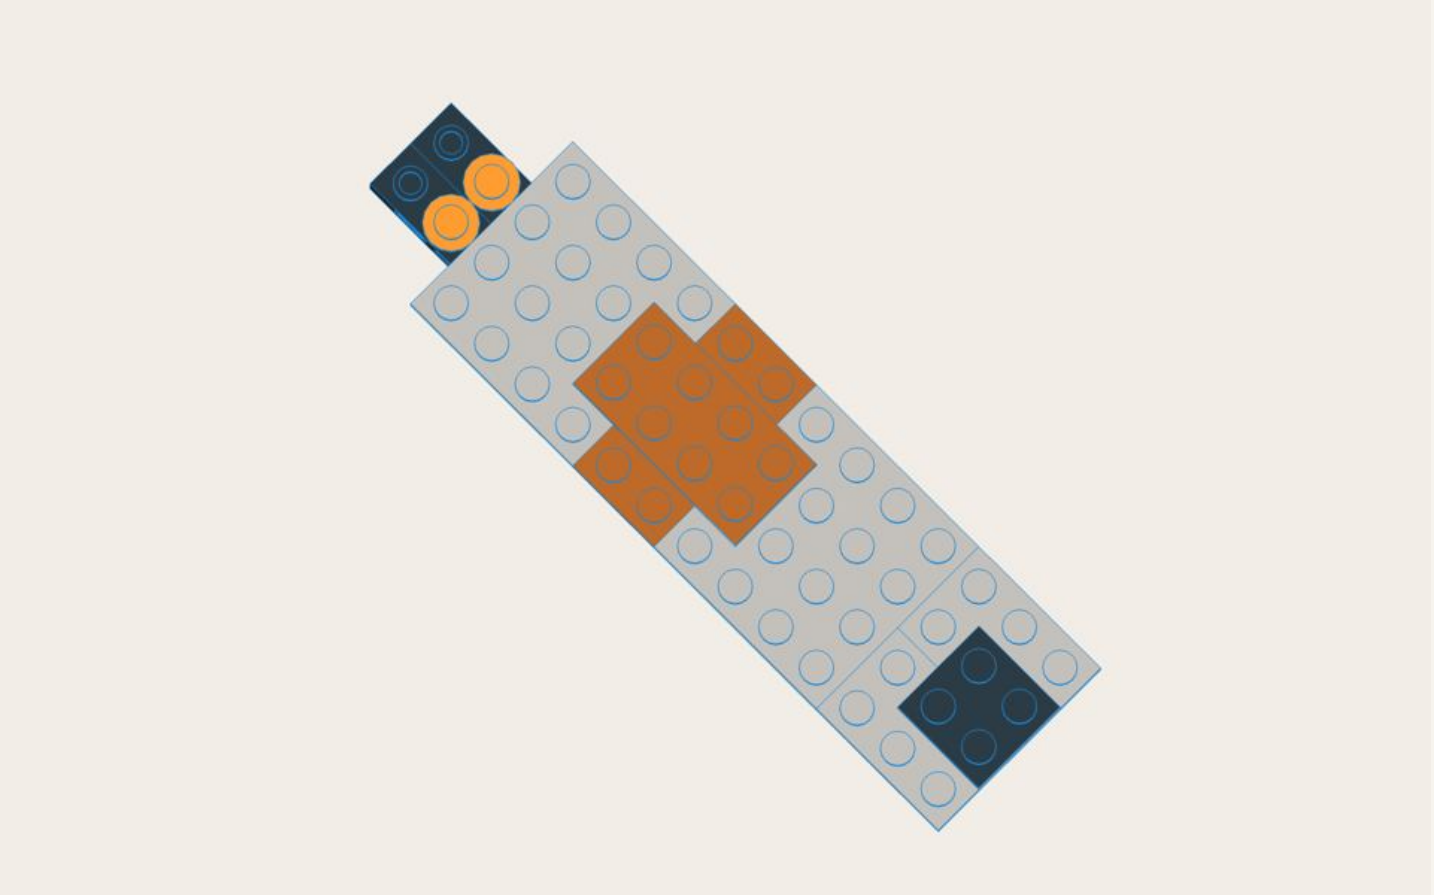

1 Build the chassis core

Panel 8 / 8

1 x COMPLETED UNIT

chassis core

13 pieces / no new loose parts

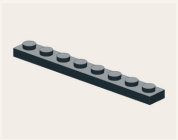

Check both pins are seated and all tie plates are fitted.

Our contributions: CC BY-SA 4.0

Our contributions: CC BY-SA 4.0

9 Fit the two suspension bands

PARTS IN THIS STEP

2× x37 · one loop per side.

Our contributions: CC BY-SA 4.0

10 Fit the two rear underside dishes

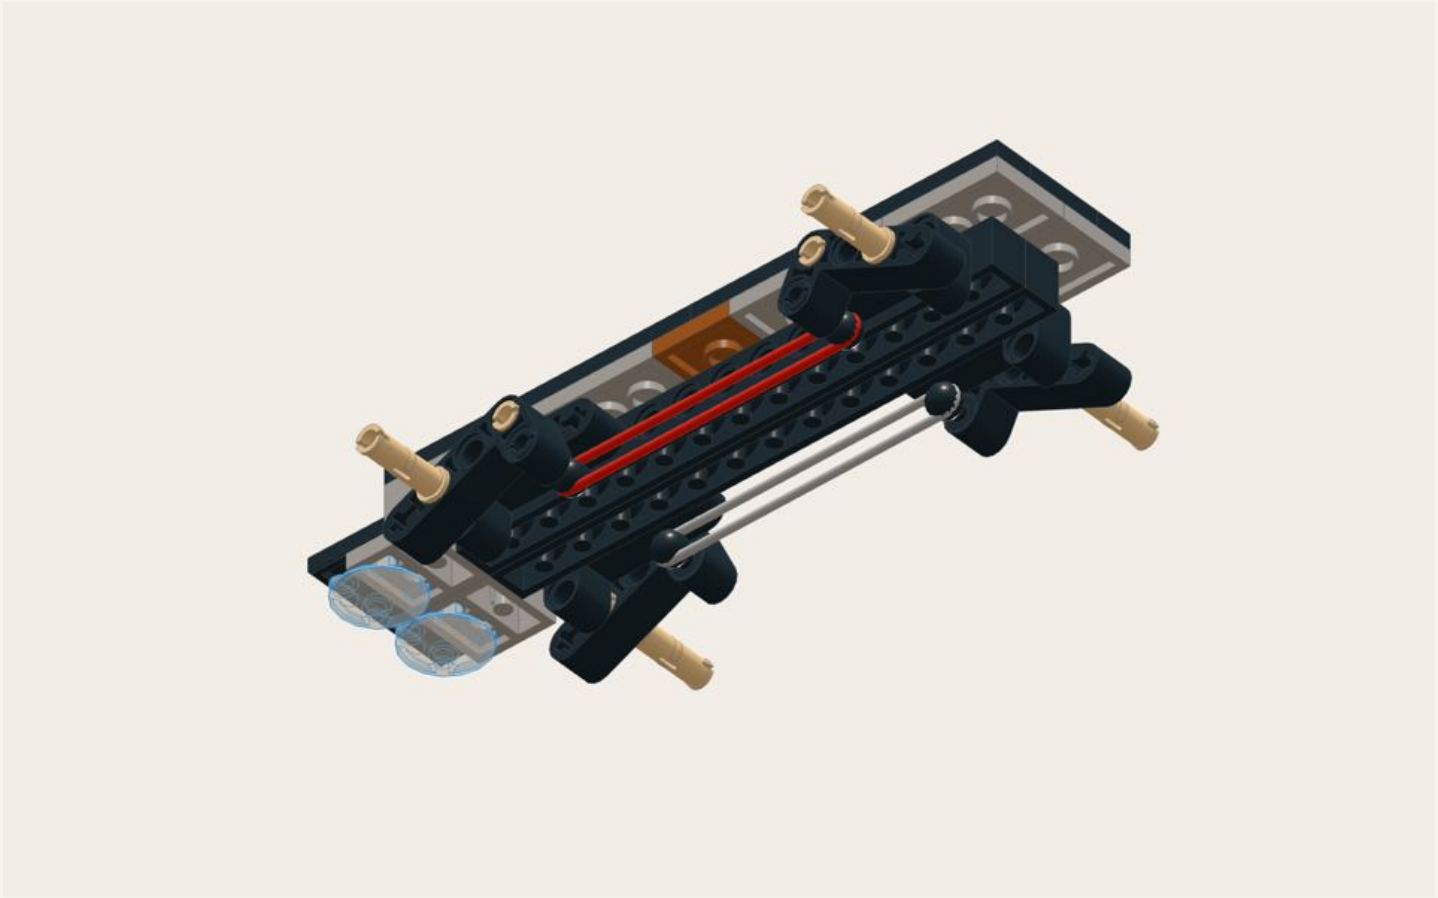

Panel 1 / 2

PARTS IN THIS STEP

2 x 2654a

Trans Clear

Turn the chassis over for underside work.

Our contributions: CC BY-SA 4.0

10 Fit the remaining rear and centre underside dishes

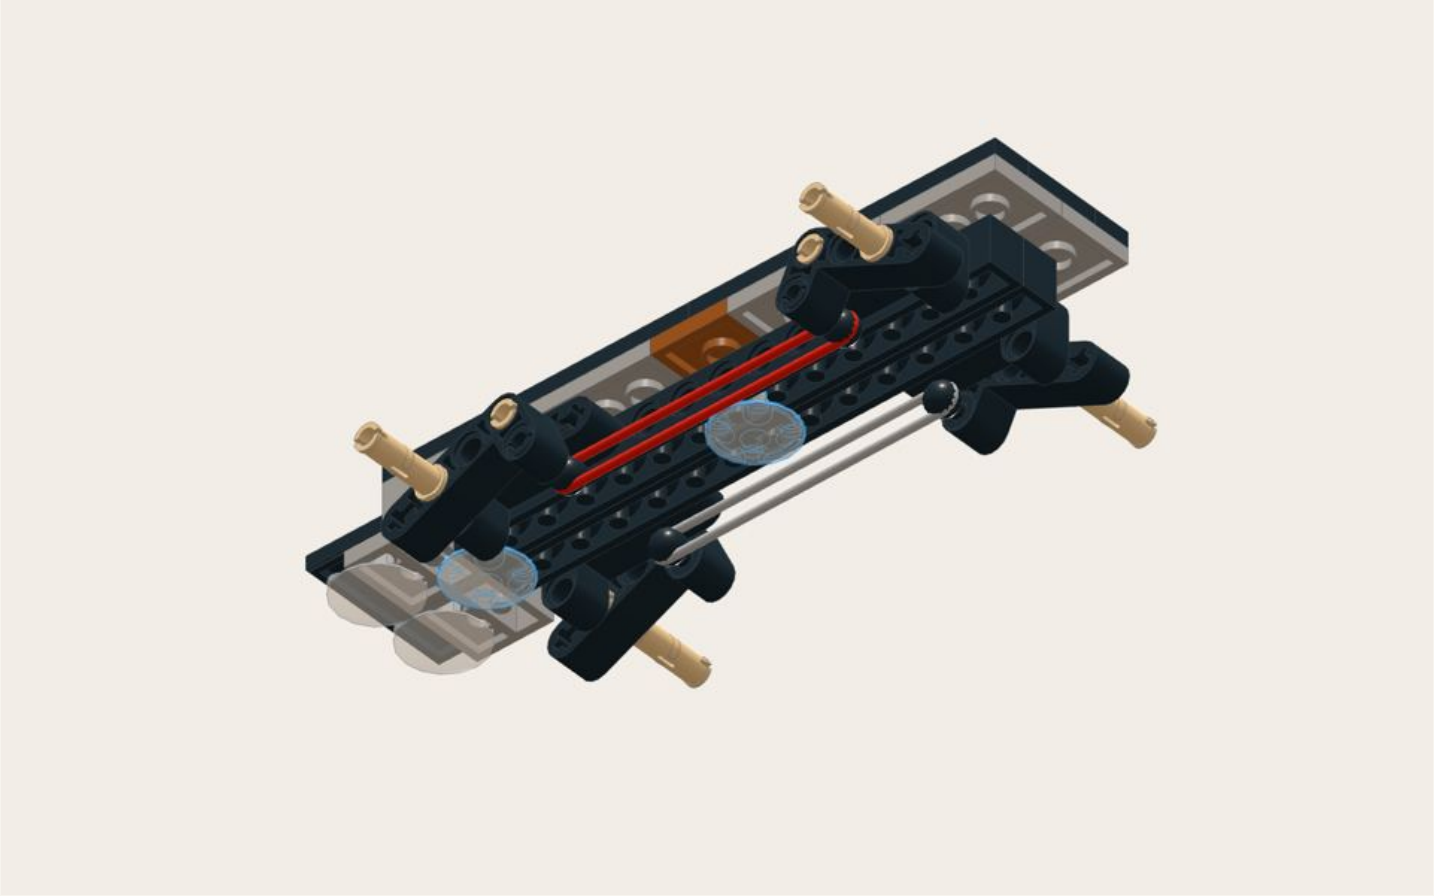

Panel 2 / 2

PARTS IN THIS STEP

2 x 2654a

Trans Clear

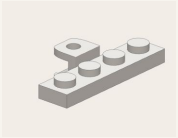

Leave the front underside dish off until the lower bumper is complete.

Our contributions: CC BY-SA 4.0

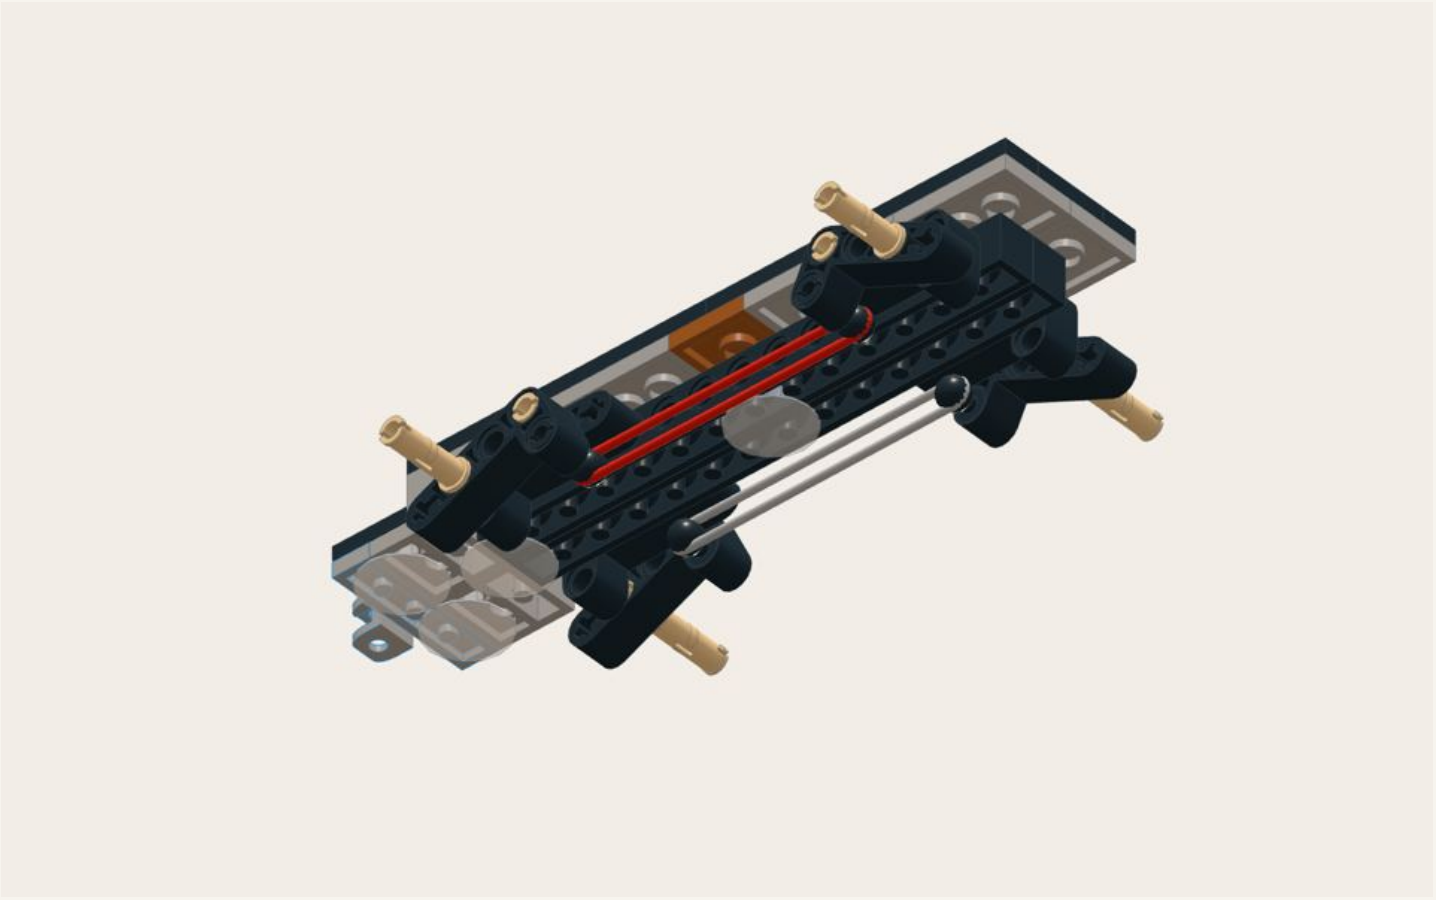

11 Fit the rear socket plate

Panel 1 / 2

PARTS IN THIS STEP

1 x 98263
Light Bluish Gray

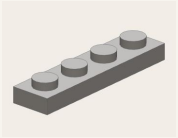

Keep the front work area open.

Our contributions: CC BY-SA 4.0

11 Start the front lower bumper on the table

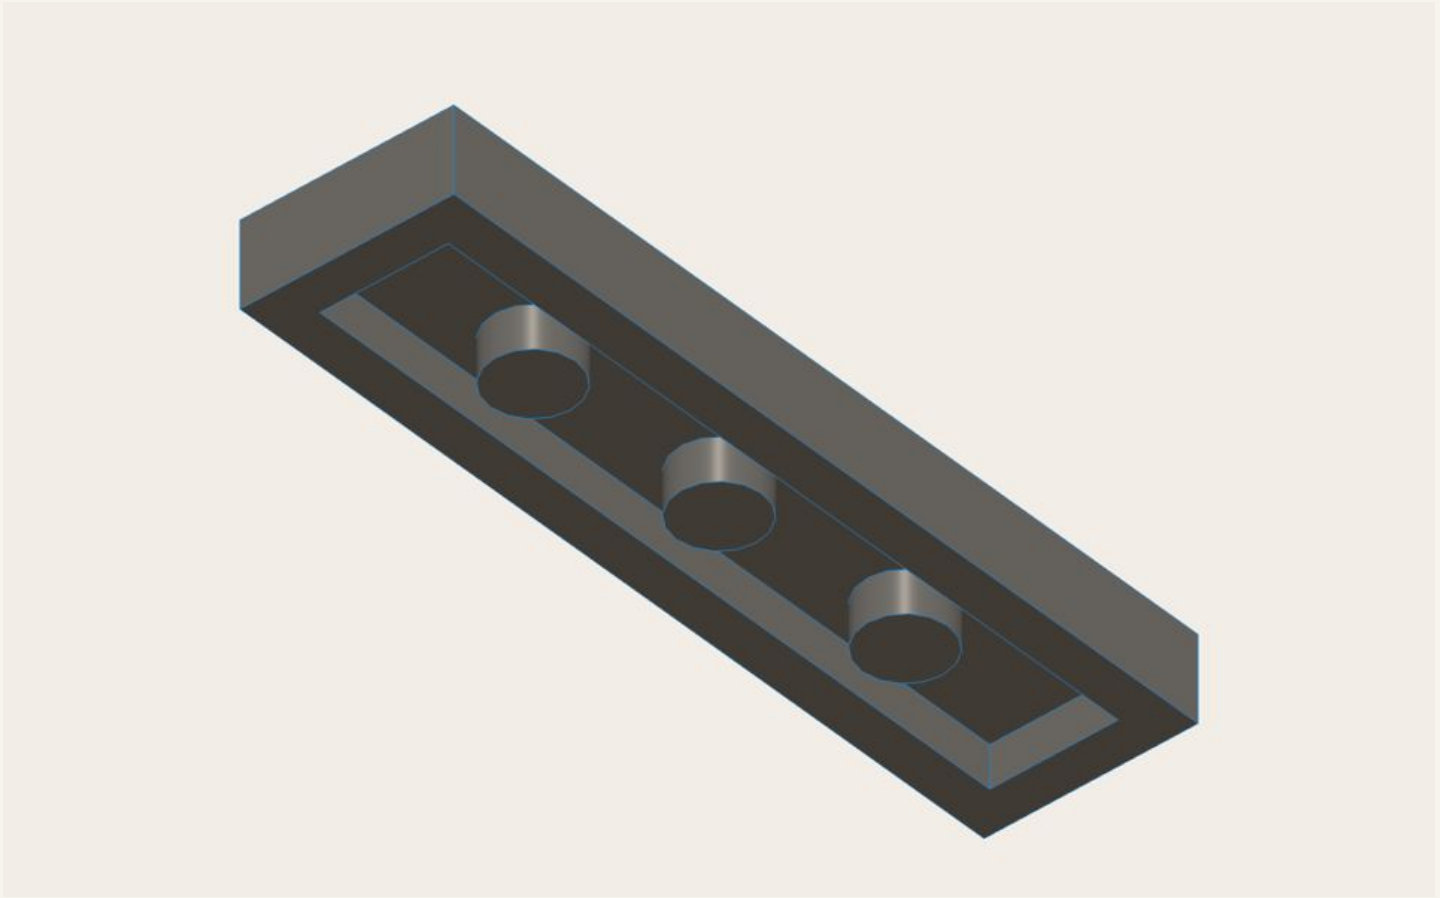

Panel 2 / 2

PARTS IN THIS STEP

1 x 3710

Dark Bluish Gray

Build the bumper separately: brackets, cap, slopes, then trim.

Our contributions: CC BY-SA 4.0

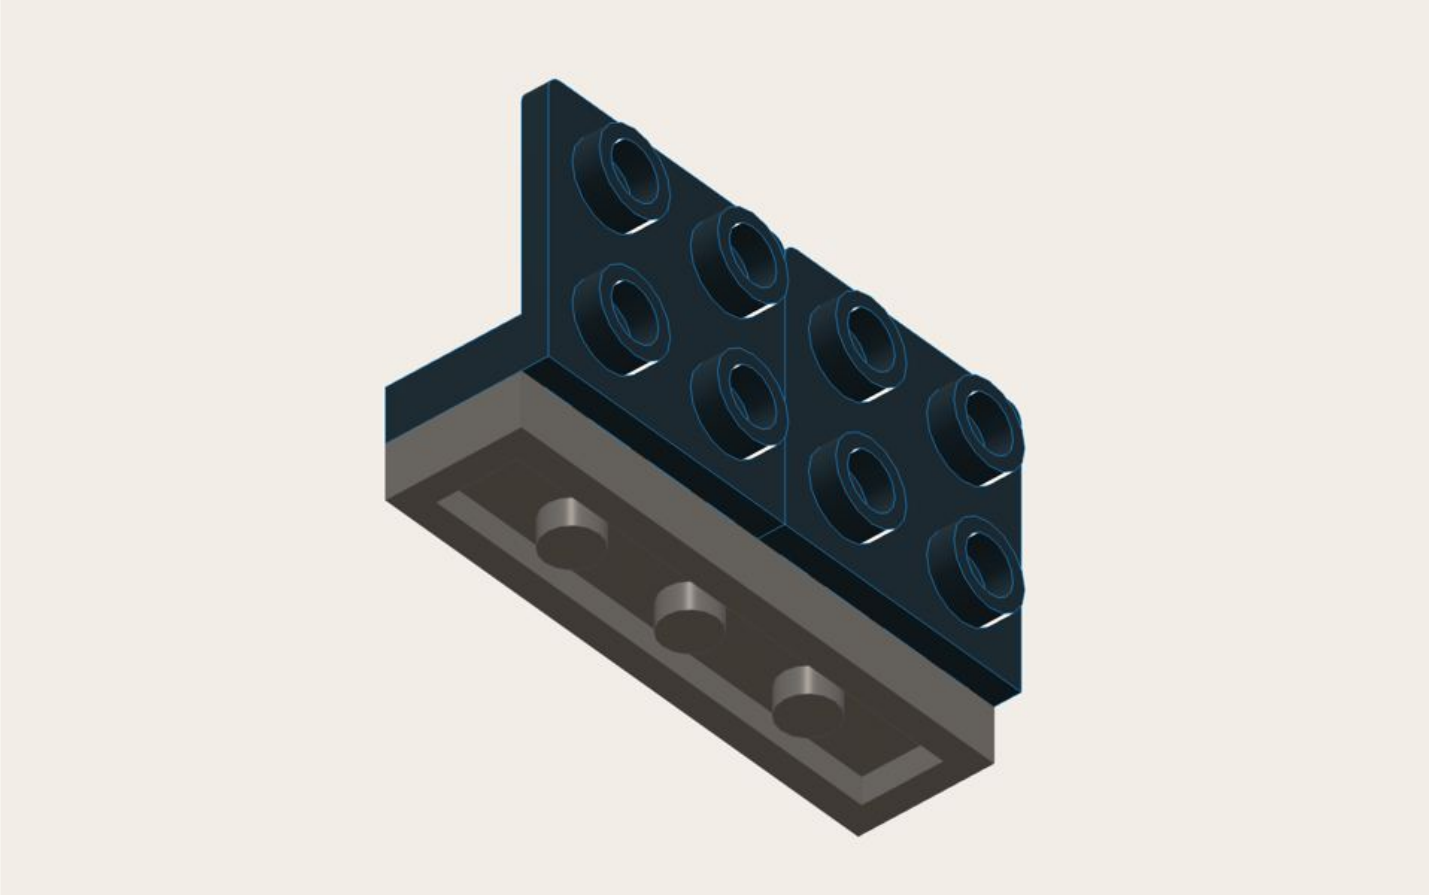

12 Fit both front brackets

Panel 1 / 8

PARTS IN THIS STEP

2 x 99207
Black

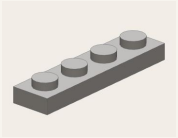

Fit the brackets to the lower tie before adding the upper cap plate.

Our contributions: CC BY-SA 4.0

12 Cap the front brackets with the upper plate

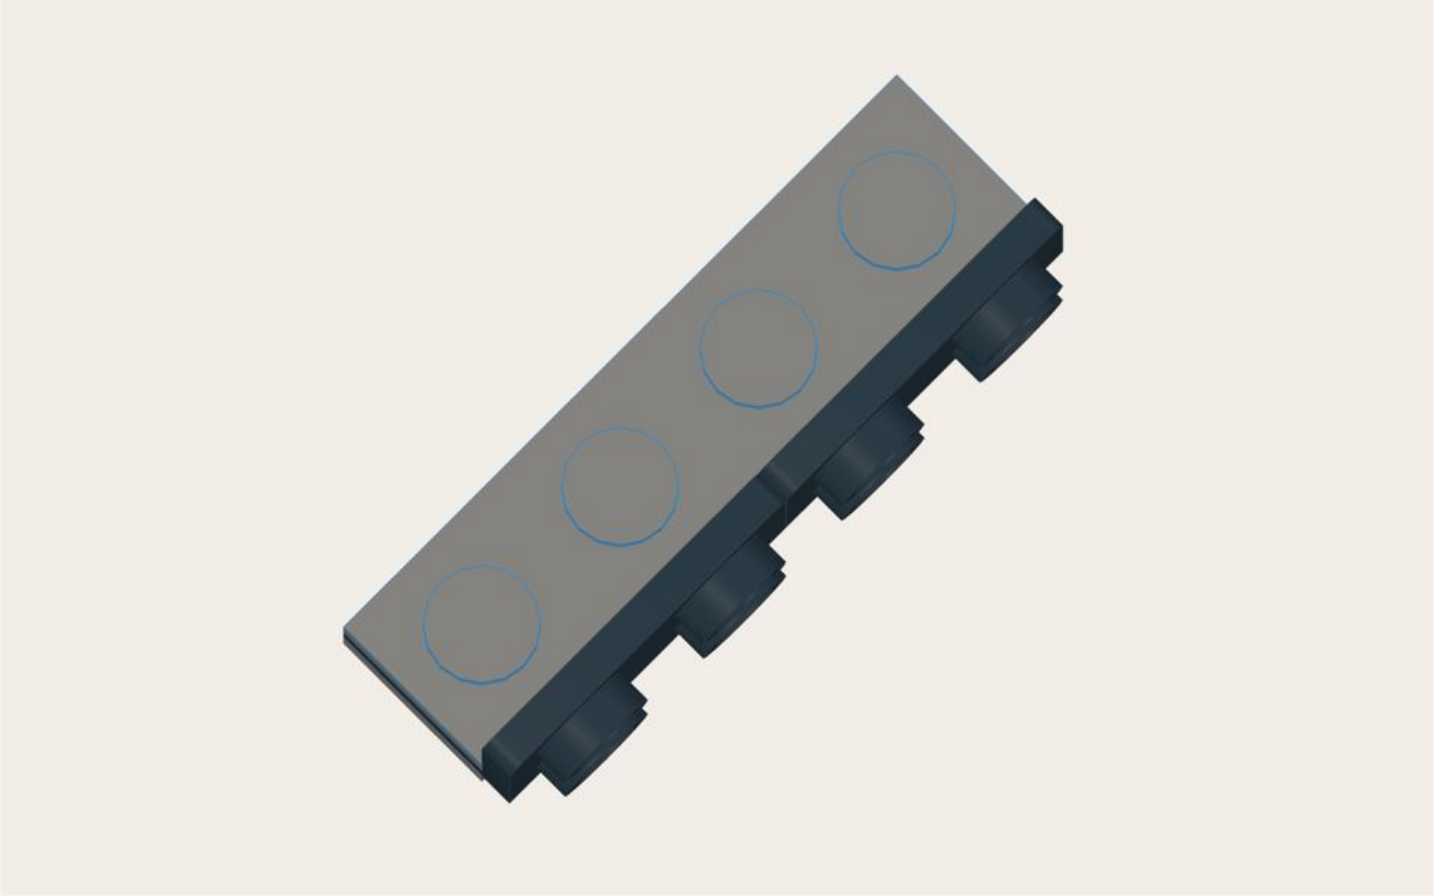

Panel 2 / 8

PARTS IN THIS STEP

1 x 3710

Dark Bluish Gray

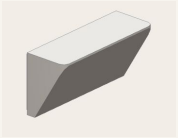

Do this after both brackets are in place.

Our contributions: CC BY-SA 4.0

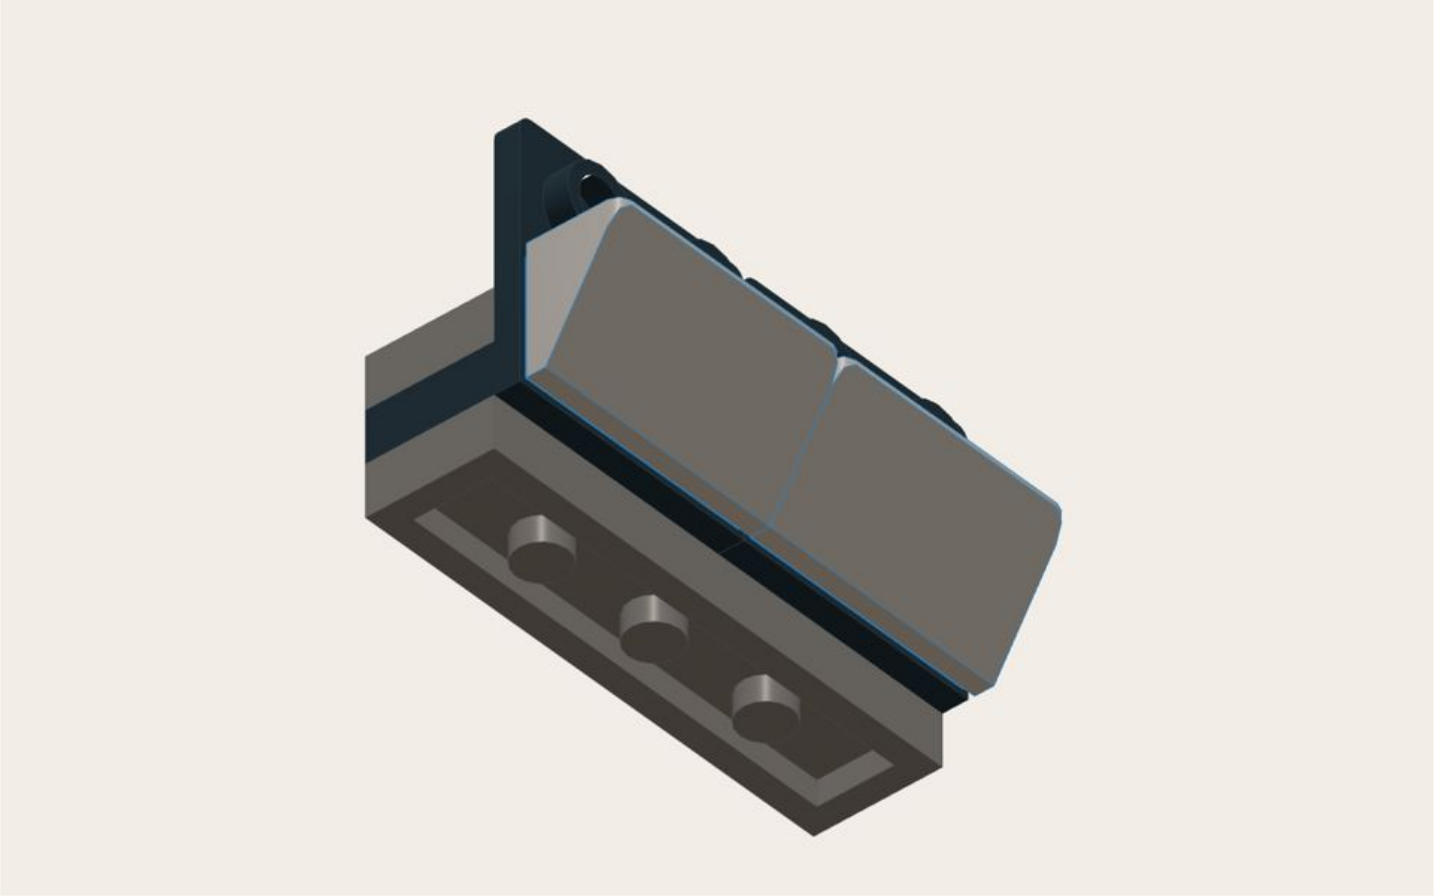

12 Fit the two lower front slopes

Panel 3 / 8

PARTS IN THIS STEP

2 x 85984
Light Bluish Gray

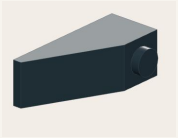

Add them to the bracket faces before the outer bumper trim.

Our contributions: CC BY-SA 4.0

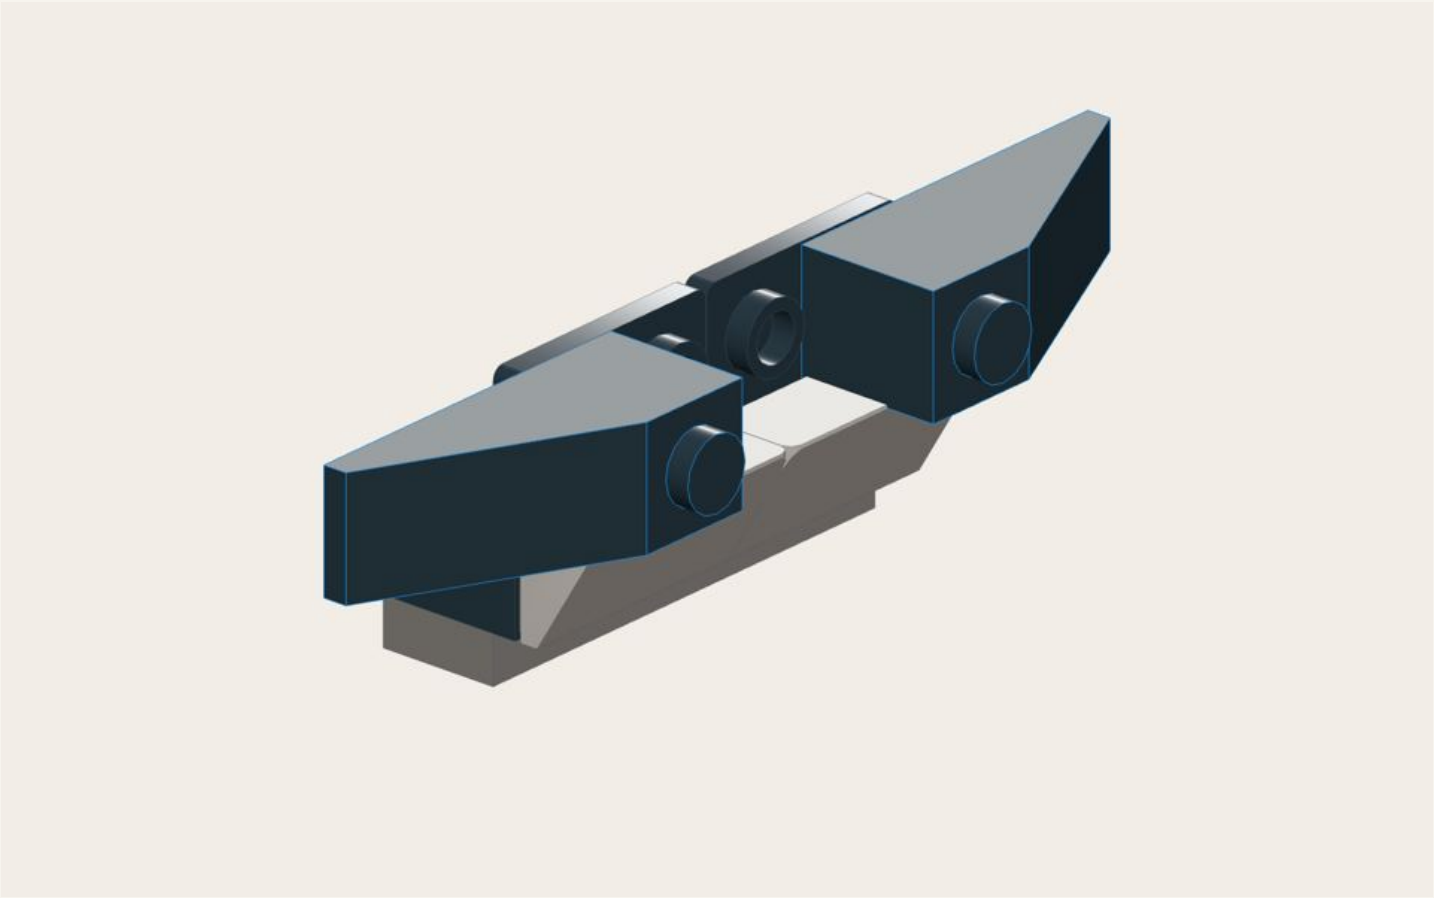

12 Fit the two outer bumper slopes

Panel 4 / 8

PARTS IN THIS STEP

2 x 4286
Black

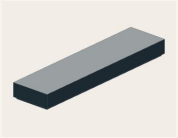

Keep the centre tile separate for the next panel.

Our contributions: CC BY-SA 4.0

12 Fit the centre bumper tile

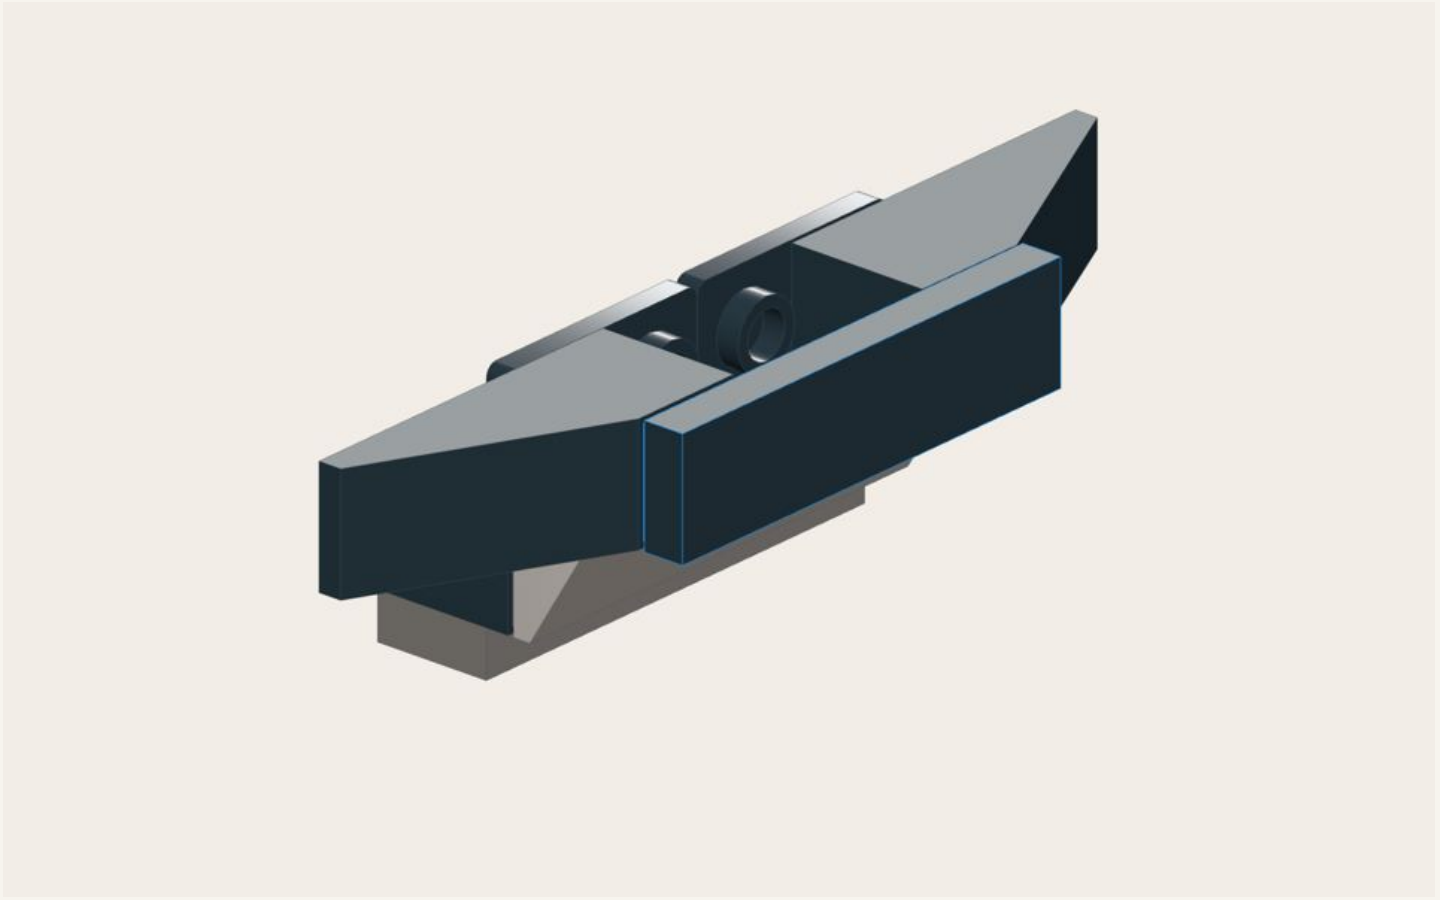

Panel 5 / 8

PARTS IN THIS STEP

1 x 2431

Black

Complete the lower bumper before adding the front underside dish.

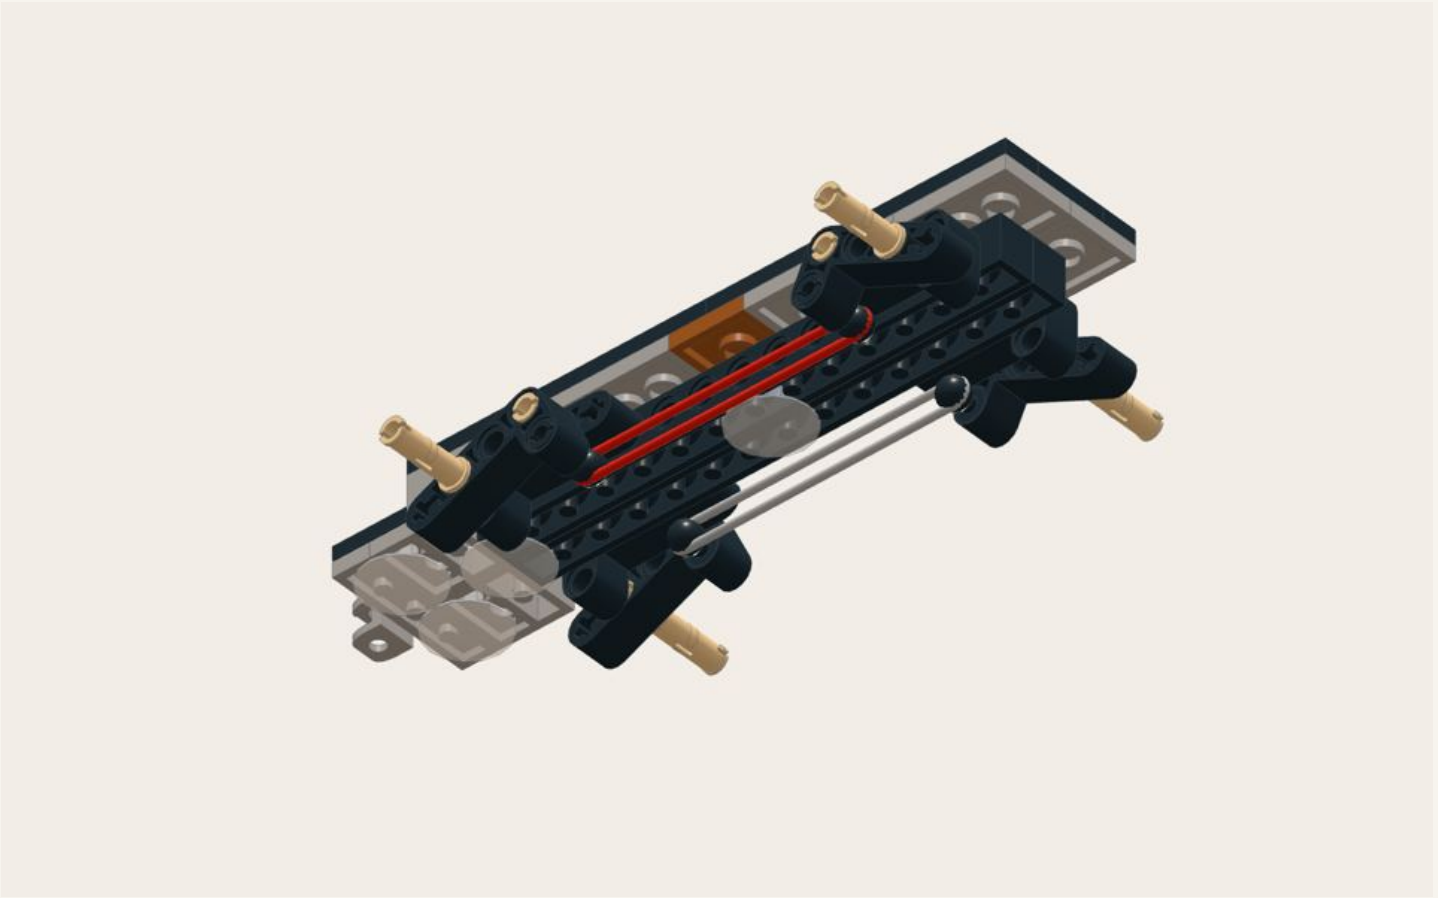

Our contributions: CC BY-SA 4.0

12 Locate the receiving structure

Panel 6 / 8

RECEIVING STRUCTURE

No new parts. Set the completed unit aside.

Locate the mounting points. Keep the completed unit separate.

Our contributions: CC BY-SA 4.0

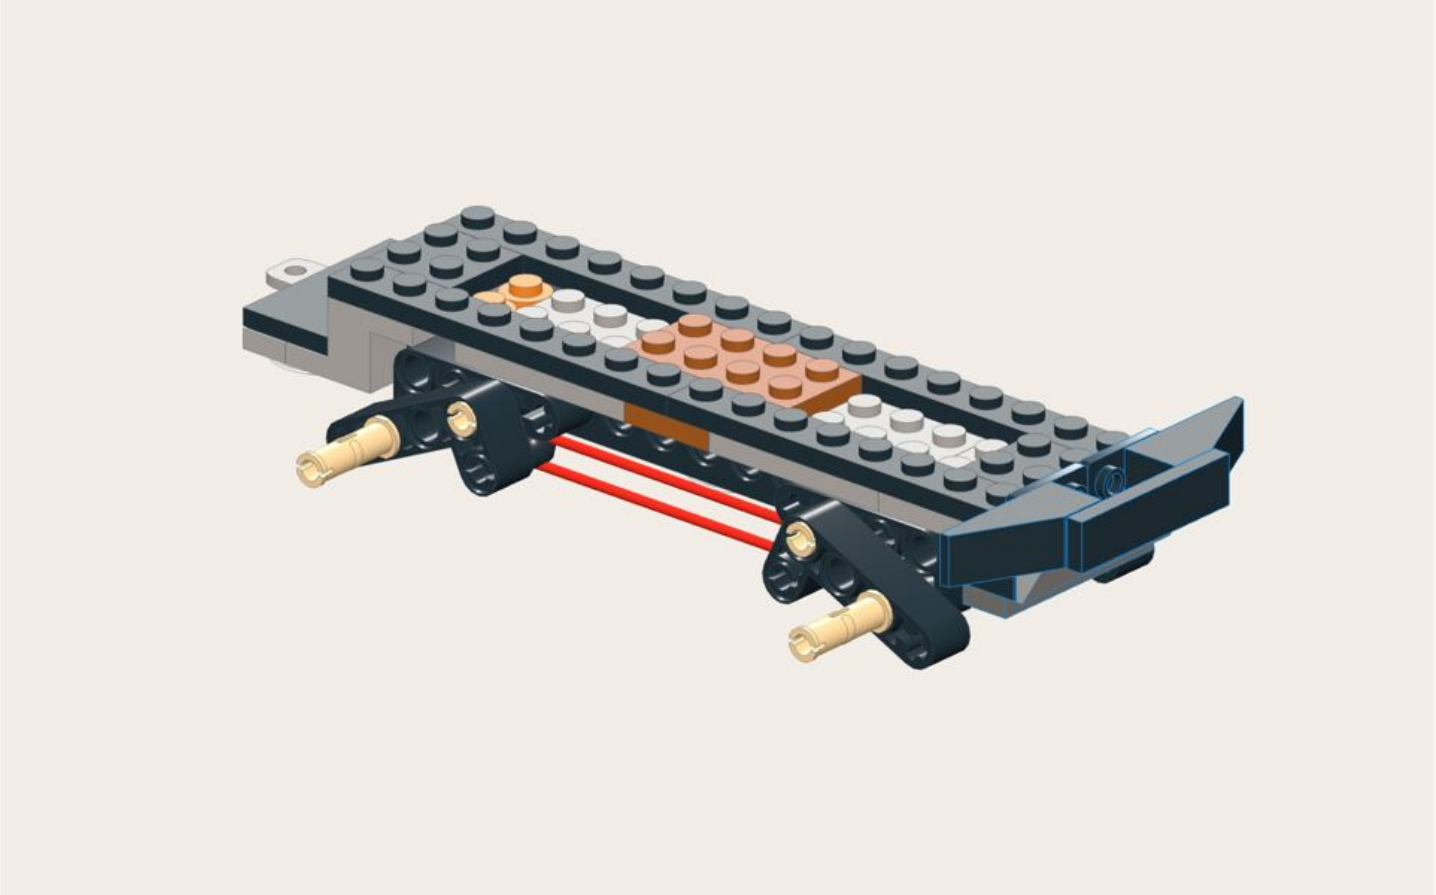

12 Fit the complete front lower bumper

Panel 7 / 8

1 x COMPLETED UNIT

front lower bumper

9 pieces / no new loose parts

Fit the cap to the front ties. Support the chassis; leave the front dish off.

Our contributions: CC BY-SA 4.0

12 Fit the front transparent underside dish last

Panel 8 / 8

PARTS IN THIS STEP

1 x 2654a

Trans Clear

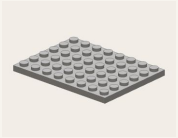

Turn over. Fit the front dish after the complete bumper.

Our contributions: CC BY-SA 4.0

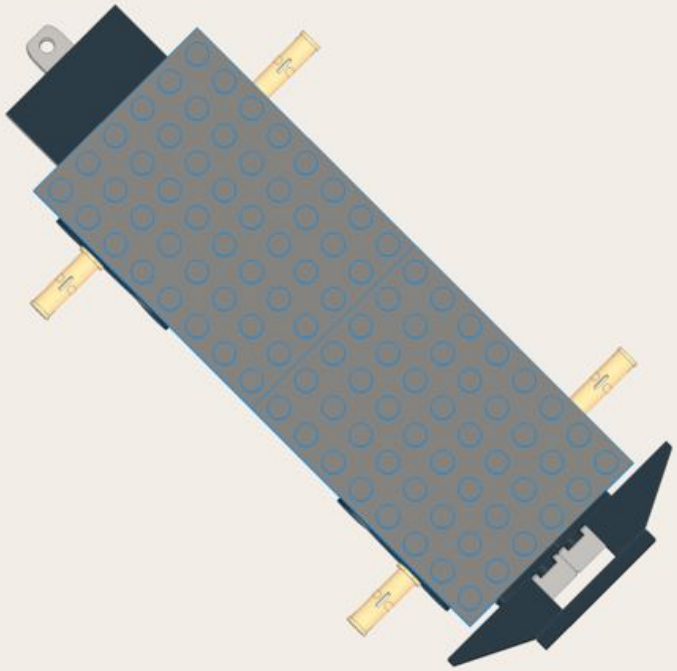

13 Install both floor plates

Turn: Studs up

PARTS IN THIS STEP

2 x 3036
Dark Bluish Gray

Our contributions: CC BY-SA 4.0

14 Build the rear floor spacers

Turn: Underside

PARTS IN THIS STEP

PRINT AT ACTUAL SIZE

Campaign sticker placement guide

For printing, use the separate vector print-and-cut sheets. This page is a fitting guide. The upper hood film spans three level tiles. Keep clips, studs and the step down to the curved hood clear.

H1 / whole upper character

30.16 x 15.76 mm

H2 / curved hood + white strip

30.16 x 16.11 mm

Banner 1 / face 1

15.76 x 15.76 mm

Banner 1 / face 2

15.76 x 15.76 mm

Banner 2 / face 1

15.76 x 15.76 mm

Banner 2 / face 2

15.76 x 15.76 mm

Wedge flag - white / clear

14.40 x 14.40 mm

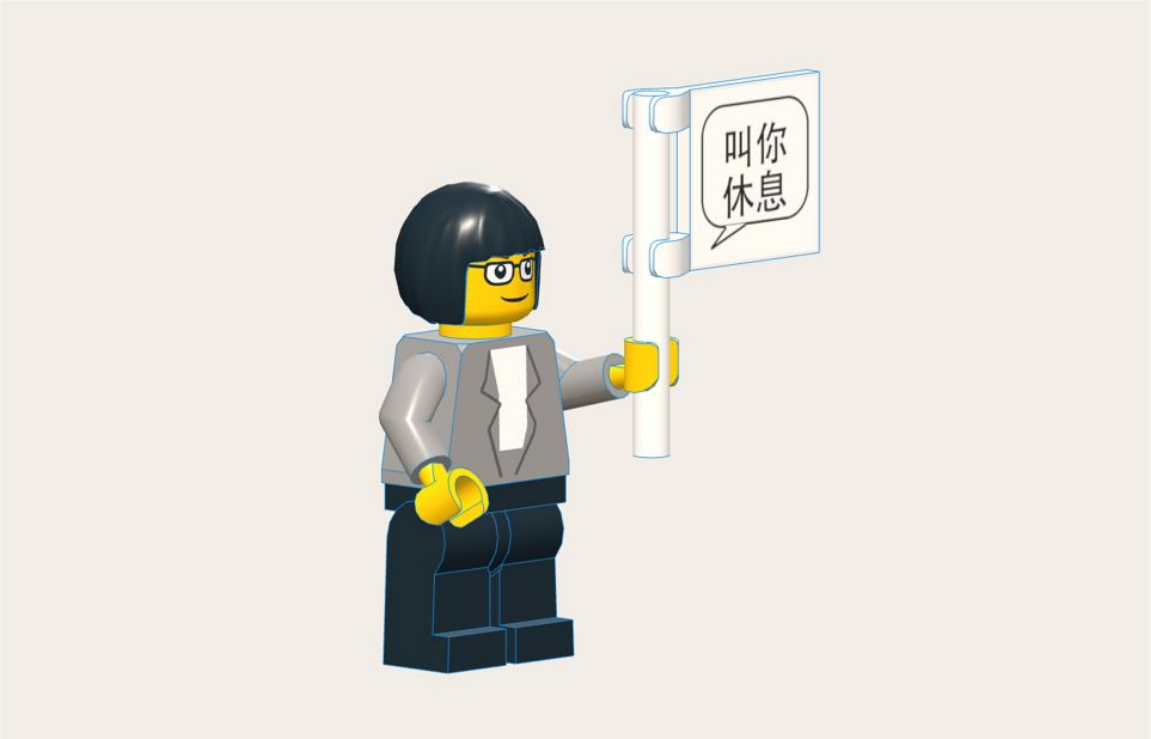

Hood: apply H1 as one clear film across the white centre tile and both level orange side tiles. Do not cut at their internal seams. H2 keeps the straight white strip on the curved hood; keep it separate from H1 at the height change. Square flags: printed Reddish Orange backgrounds on White parts, both faces. Wedge: white emblem on clear film.

20 mm

Checks and remaining physical tests

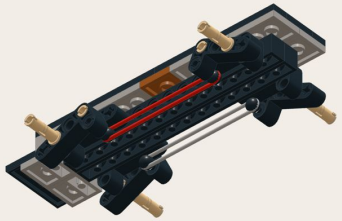

DIGITAL COVERAGE

348 rigid parts, introduced once. MPD poses and inventory match.

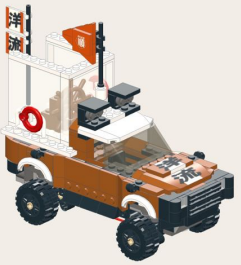

MAST + PLATFORM

Dry-fit clips and mount. Support the chassis; do not lift by equipment.

SUSPENSION

Fit both bands. Check wheel clearance and suspension travel.

CORD + STICKERS

Check threading, knot slack and paper fit before final application.

Full credits on the website →

Targeted digital fit checks only. Full continuous assembly replay, physical grip, stiffness and handling strength remain unverified.
